SUMMARY

AI&DS undergraduate with strong foundation in Python, C++, Data Structures & Algorithms, and Software Development. Hands-on experience in Machine Learning through internships and in developing full-stack applications through real-world projects and hackathons. Passionate about developing AI-powered software solutions and applying machine learning techniques to solve real-world problems.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

2023 – 2027

Velagapudi Ramakrishna Siddhartha Engineering College

CGPA: 8.77

Relevant Coursework : Machine Learning, Data Structures and Algorithms, OOPS, DBMS, CN

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, C++
- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **AI & Data:** Generative AI, LLMs, NLP, Retrieval-Augmented Generation (RAG)
- **Tools & Platforms:** AWS, Git, VSCode, Git Hub

EXPERIENCE

AI & ML Intern | SmartBridge Educational Services Pvt. Ltd.

June 2026 – July 2026

[GitHub](#)

- Developed a ML-based **Human Development Index (HDI) Predictor** using Python, Pandas, NumPy, Scikit-learn, and Flask, and built an interactive web dashboard to predict a country's HDI using life expectancy, education, and GNI per capita.
- Performed data preprocessing, EDA, model training, evaluation, and Flask deployment, achieving an R^2 score of 97.23% and enabling real-time HDI prediction with automatic classification into four human development categories.

PROJECTS

GrocBankX - Secure Grocery Payment System

Feb 2026

Tech Stack: React, Next.js, Flask, Scikit-learn, PostgreSQL, Face Recognition

[GitHub](#)

- Developed a secure grocery payment system using machine learning-based fraud detection and real-time face verification. used a Random Forest fraud detection model on an imbalanced credit card transaction dataset and applied SMOTE to improve fraud detection accuracy.
- Implemented risk-based authentication using webcam-based face verification with eye-blink detection to prevent spoofing attacks and reduce false transaction blocking.

Student Monitoring & Attendance Management System

Jan 2026

Tech Stack: React + Vite.js, Node.js (Express), MongoDB Atlas, OpenStreet Maps API

[GitHub](#)

- Developed a web-based student transportation monitoring platform with live bus tracking, attendance management, and route visualization dashboards for admins and parents.
- Built real-time attendance analytics and automated SMS/email alert systems for student safety and transport monitoring.
- Implemented cloud-connected backend services for attendance synchronization, route tracking, and secure storage of transportation records using MongoDB Atlas.

CERTIFICATIONS

- AWS Certified AI Practitioner – AWS
- AWS Certified Machine Learning Engineer – Associate – AWS
- SAP Generative AI Developer – SAP
- Database Programming using SQL – Oracle Academy
- Python Essentials – Cisco

ACHIEVEMENTS

- **First Author, IEEE Publication** – Smart School Bus System
- **IEEE Secretary** – GeoScience & Remote Sensing Society (GRSS), VRSEC Chapter (Jan – Dec 2026)
- **250+ DSA Problems** solved on LeetCode, and GFG
